12 June 1975

MEMORANDUM FOR: The National Working Group

SUBJECT : Working Group Report

1. Attached is the draft of our portion of the final Working Group report. Request you review it and if questions arise concerning another member's area of responsibility, contact him for clarification. If you cannot resolve it, make the necessary change on your copy and we will negotiate at the next meeting. Feel free to note changes on your copies. We will go over the draft page by page at the next meeting.

2. You will note that conclusions and recommendations are not made. This is a Committee responsibility; therefore, note down your own conclusions and recommendations including the reasoning. We will consolidate and draft that portion of the paper at the next meeting.

3. Also, there is one last portion of the paper requiring Committee action--the Obstacles Section. Refer to the strawman outline of the Pilot Study Group Report for this section. We must make a strong contribution and it is a Committee responsibility.

4. The next meeting is scheduled for 0930 Monday, 23 June 1975 in Room 6E0708. The duration of the meeting will be until we are completely finished with the report.
